## PROJECTS

### Online Resell Market :

[Live Site](#) || [Client Side](#) || [Server Side](#)

It's a common marketplace where people can buy and sell secondhand Ac Tv and refrigerator easily. It's a fully developed website made with React, React query, Firebase,Tailwind,Express js, mongo DB, Node js

- Buyers can buy cars through payment also have purchased list to manage them.
- Sellers can sell, advertise and manage (delete, add) their Products.
- Admin will have every access of buyers, seller account, reported items management, proper admin functionality.

### Dentist Portal site:

[Live Site](#) || [Client Side](#) || [Server Side](#)

This is portal web application where user can book an appointment for any specific schedule and confirm it by payment. This website is built with React, tailwind, daisyUi,firebase,mongo db,express,Node js deployed in vercel.

- User can only book an appointment of a specific available once.Means he/she cannot book other schedule on that treatment.
- Implemented authorization and token validation using JWT in thw whole website
- Users can add booking to list and make payment to confirm the booking of the treatment can have Gmail confirmation.
- Travel management System [Live Site](#) || [Client Side](#) || [Server Side](#)
- user can create book any package which place they want to go.I have implemented proper validation in the form.
- Private route is also implemented. Only registered user can add review and edit their review here.
- customers are given their comments if they want some special service.
